

Product Information

Triasorb M

Product Description:

Triasorb M is a clear, thick, colorless to deep yellow liquid that primarily consists of 1,3,5-trimethylhexahydro-1,3,5-triazine. Triazine derivatives are the most effective and economical way to remove hydrogen sulfide in petroleum products. Triazine derivatives are efficient and high performing scavengers because each mole can scavenge 2-3 moles of hydrogen sulfide.

Applications:

Triasorb M is used as a hydrogen sulfide scavenger in oil and petrochemicals production, in gaseous and aqueous media, and as a biocide additive for lubricants/coolants.

Specifications:

Parameters (units)	Specifications
Appearance	Clear, thick colorless to deep-yellow liquid
Density, at 20 °C (g/cm ³)	0.95 - 1.03
pH, at 20 °C	≥ 9
Melting point (°C)	- 30
