

Product Information

Extrema-CA®

Product Description:

Extrema-CA® Amorphous Calcium Aluminate Cement has high strength, excellent slump retention, excellent adhesion, long working life and no efflorescence. Extrema-CA® Amorphous Calcium Aluminate Cement is produced by fusing high grade bauxite and limestone in an electrical arc furnace and then through specialised air blowing technology. The clinker is then finely grounded to a controlled specific surface area with a ball mill.

Applications:

Extrema-CA® Amorphous Calcium Aluminate Cement is used as an additive to cement as a hardener and accelerator. Ideal for use as a construction concrete even at low temperature and for refractory concrete due to its high strength even at high temperatures.
