Product Information

PP Fibers - Polyfibril

Product Description:

PP Fibers - Polyfibril are polypropylene synthetic microfibers that have been specifically designed for shotcrete, tunnel linings and other concrete structural reinforcement applications. The fibers increase the strength and cracking resistance of the concrete by effective energy absorption and load distribution of the concrete, reducing the amount of concrete required and maintenance costs. Synthetic fibers are homogenous, light weight, non-magnetic and corrosion resistant unlike steel fiber and wire mesh. Polypropylene fibers have high thermal and chemical stability.

Applications:

PP Fibers - Polyfibril are used as an additive in shotcrete and concrete to increase its strength, cracking resistance and reduce spalling. It can be used in industrial floors, shotcrete, tunnelling, field concrete, precast concrete, construction chemicals and refractory applications.

Chemical Formula:

 $(C_3H_6)_n$

CAS No.:

9003-07-0

Specifications:

Parameters (units)	Specifications
Color	Colorless and clear
Tensile strength (MPa)	189 - 325
Elastic modulus (MPa)	2206 - 2953
Elongation (%)	5.9 - 9.3
Specific weight, approx. (g/cm³)	0.91
Durability, Denier (g/D)	6.5 - 7.0
Number of filaments (no./kg)	≥ 120 million

Bisley International LLC 1790 Hughes Landing Boulevard Suite 400 The Woodlands 77380 TX USA Phone number: +1 (844) 424 7539 Emergency telephone number: +1 855 237 5573

Dosing:

Doses of synthetic macro fibers vary between $0.6 - 2 \text{ kg/m}^3$ depending on desired engineering requirements. Homogeneous mixture is obtained by the addition of PP Fibers - Polyfibril to the aggregate band at the concrete batching plant or by mixing in a high-speed concrete mixer for 5 - 6 minutes. It is recommended to use plasticizer additives in high doses.

Packaging:

Material is available in 5 kg bags. Further packaging options may be available upon enquiry.

Storage:

Product should be stored in a dry place away from direct sunlight in sealed, original packaging. Should not be stored near flammable and oxidizing material.

Safety:

For further safety information refer to product SDS available from your Bisley International contact.
